Featured Challenges

Two Sum

Given an array of integers nums and an integer target, return indices of the two numbers such that they add up to target.

easy • 100 points

Solve Challenge

Valid Parentheses

Given a string s containing just the characters "(", ")", "{", "}", "[", and "]", determine if the input string is valid.

easy • 150 points

Solve Challenge

Binary Search

Given an array of integers nums which is sorted in ascending order, and a target integer, write a function to search target...

medium • 200 points

Solve Challenge

Merge K Sorted Lists

You are given an array of k linked-lists lists, each linked-list is sorted in ascending order. Merge all the linked-lists into one...

hard • 300 points

Solve Challenge

About CodeChallenge

Empowering developers to grow through interactive coding challenges

</> Our Mission

To provide a platform where developers can enhance their coding skills, learn from peers, and prepare for technical interviews through hands-on practice.

👥 Community

Join our growing community of developers who support each other, share knowledge, and collaborate on solving challenging problems.

Why Choose Us

Curated Challenges

Carefully selected coding challenges across different difficulty levels

</>

Real-world Problems

Practice with challenges inspired by actual technical interviews

🌟

Learn & Grow

Track your progress and improve your problem-solving skills

CodeChallenge

Improve your coding skills with our interactive coding challenges and learn from the community.
